

BLOCKCHAIN : BUSINESS AND TECHNICAL FUNDAMENTALS

Nurturing Hyperledger Experts

HYPERLEDGER
TRAINING PARTNER

Overview

The program is carefully curated to kick-start coding abilities in Hyperledger Fabric & Indy. Gain insights on how enterprise systems are transformed with Hyperledger Implementations.

Learning Outcomes

- Understanding of how blockchains work and how they create value for business through cost-savings and efficiencies
- Gain familiarity with current Hyperledger projects and cross-industry use cases
- Understand and articulate basic and advanced concepts behind Hyperledger Fabric & Indy
- Ability to setup your own flexible business blockchain using the Fabric framework and leverage Indy for certificate & authenticity management
- Hyperledger certificate issued to successful candidates taking the certification exam

Who should attend?

IT professionals/students aspiring to build a career on enterprise blockchain development or administration. Ability to write simple code in Java / NodeJS is needed to participate in exercises.

Course Highlights

4 days [32 Hours]

Pre Requisites:

Coding Skills (Elementary Level)

Fluency in English

List Price

RM6000

Course Outline

Day 1

- Introduction to Blockchain
- Discovering Blockchain
- The Promise of Blockchain

Day 2

- Introduction to Hyperledger
- Hyperledger Composer

Day 3

- Hyperledger Fabric : Concepts & Fundamentals
- Hyperledger Fabric : Hands-on Coding

Day 4

- Hyperledger Indy : Concepts & Fundamentals
- Hyperledger Indy : Hands-on Coding
- Certification Exam [Optional]

Brought to you by,

Trainer's Profile
